

## Travelers' Health Insurance

I understand that international travelers' health insurance is required for each UFM Master of Finance and/or Master of Management module that I attend outside my home country. The purpose of the insurance is to cover any medical expenses that I may incur while traveling with the program.

I further understand that obtaining the insurance and providing proof of insurance to my university's program coordinator is my responsibility.

Further, I acknowledge that neither my home university nor Tulane University is responsible for providing medical insurance or covering medical expenses while traveling abroad with the program.
